

Bird Strike - Real World Experience

A local CFI talks about his and his student's recent encounter with a waterfowl that struck and shattered the windshield, injuring the instructor. CFI Chris Criswell will share what happened and how he and his student safely and successfully brought the plane back to the airport. From that, he offers tips for pilots how to respond to bird strike events. He will also discuss FAA bird strike research, the bird strike database, NTSB reporting, and lessons learned.

Directions: The seminar is at the Chesapeake Sport Pilot building in the maintenance hangar. Prior to attending a safety seminar please review and abide by current CDC, State and Local health guidelines.
